GRUNDTVIG ICAMS

Our parents' group decided to question about how:

AIMS: to promote the respect towards the environment modifying people's commonlife habits

In this view the group used these:

MEANS:

1) test screening on people's habits of recycling waste and saving energy

2) environmental safeguard courses for parents and children

3) students' involvement in nature safeguard activities promoted by specific organizations

4) spot and pamphlet promotion on recycling at school and at home in the school district suggesting little things people can do to preserve the environment

5) handcraft activities reusing what is usually considered waste: realization of products with recycled material (Crib "presepe", musical instruments, games...)

OUR EXPECTATIONS: increasing the awareness of the importance to protect the environment for our *today* and our tomorrow
