### **Summary of the work at Laura Lanza Comprehensive School**

*by the Grundtvig Project team*

The work is going on towards testing how and if a change of attitude is taking place in the families living in our school surroundings.

Guided by the teachers parents and students are involved in a new questionnaire that is being administered to the families living nearby to realize if there is a change of attitude towards recycling and reusing.

Datas are being tabulated in the meanwhile. The attention of the work team is moving towards another challenging theme "HOW TO SAVE ENERGY" producing posters on good attitudes to have, at home and at school.

The aim is also to create an ECO corner at school where to put posters and photos on the theme of SAVING ENERGY TO SAVE OUR PLANET.

The pictures will stress the importance of attitudes like turn off the tap while brushing your teeth or having a shower (this is a great saving of water, precious and non-endless resource); do not use any kind of sprays (they contain dangerous gas for the environment) and buy those containing fluids without gas addition instead (this way we greatly care of the air we breathe); turn off the light when you leave a room or a classroom; etc. The work is in progress.
