Project Summary

Objectives

The title “Together we learn, together we Grow” expresses our main purpose which is to promote collaboration among European schools on the following four topics : Respect for our Planet, Cultural identities, Live healthy and Safe and free use of I.C.T. We are strongly convinced that through the power of Erasmus project our students will reinforce and experiment concepts such as cultural diversities, solidarity, inclusion, equality, equity and awareness of globalization of problems.

Activities

All six partners (Cyprus, Romania, Bulgaria, Greece, 2 from Italy) with around 105 teachers and 1500 pupils during the project, intend to show the power of KA2 collaboration on improving key competences for developing a safe use of I.C.T. , removing the barriers to social inclusion and providing ways of turning schools into learning communities. Teachers and pupils will work using collaborative methods and they will make use of technological devices to implement skills and competences.

Impact

During the entire period of the project our expected results are to promote the value of cultural identity, respect for the Enviroment, a correct approach to digital technology and promote social inclusion. We intend to develop participants' social and personal skills; to plan and implement practices for tackling social exclusion; to increase awareness about the power of Erasmus+ programmes for supporting the development of transversal skills.
